

# LJ TRANSMITTER

## CRANE REMOTE CONTROL

The LJ is a lightweight crane remote control transmitter with dual-axis joysticks. Its completely sealed plastic injection molded case and low profile, stainless steel switches offers the flexibility to customize the switch options to fit your needs. When combined with the Advantage Series receiver technology, the LJ transmitter becomes one of the most versatile transmitters on the market today. Built with safety and operational efficiency in mind, features such as a built in switch diagnostics and switches that easily plug into the board ensure the LJ is ready to meet the challenge.
